

KRYTEX OPTIC

Abrasive ultra-cleaner for glass

Packaging: **100 ml / 500 ml**

Enough for: **500 ml ≈ 10–20 cars**

Removes water spots, film and stubborn dirt from glass — the prep step before a hydrophobic coating such as KRYTEX MEGA GLASS.

KEY PROPERTIES

- Removes water spots and stubborn dirt.
- Fine mineral abrasive.
- Prepares glass for coating.
- An even sheet of water confirms the glass is clean.
- Applied by hand — no polishing machine needed.
- Polishes the glass and makes it smoother.
- pH-neutral formula.
- Pleasant scent.

SPECIFICATIONS

Type	Ready to use	Volume	100 ml / 500 ml
Application	Glass & headlights	Enough for	500 ml ≈ 10–20 cars

HOW TO APPLY

- 01** Remove the main dirt from the glass and let it dry slightly.
- 02** Shake vigorously for 2–3 min until the sediment is mixed.
- 03** Apply to a felt applicator or microfiber and clean with circular or straight strokes and light pressure; add product as needed.
- 04** Remove residue with water or a damp microfiber. If water forms an even, unbroken sheet, the glass is clean; otherwise repeat.
- 05** Dry with a microfiber or lint-free paper. Use at least every 6 months.

COMPOSITION & STORAGE

Composition	Purified water, hard mineral blend, surfactant blend, fragrance.
Shelf life	36 months
Storage	Keep tightly closed in the original container in a dry place at 0...+25 °C, away from direct sunlight. Do not use after the expiry date.
